

# ACTUARIAL SERVICES FOR INSURANCE COMPANIES

## HIGH-YIELD AND RISK-ADJUSTED INVESTMENT STRATEGY

### Responsible actuary in accordance with Art. 23f of the Swiss Insurance Supervision Act (VAG)

As actuaries responsible for life insurance, indemnity insurance and reinsurance, we safeguard compliance with regulatory requirements.

### Actuarial services

We support our insurance clients in all actuarial areas according to their individual needs. These include SST, ORSA, financial disclosure, operating accounts, pricing, technical provisions, MCEV and insurance accounting.

## YOUR BENEFITS, OUR PROMISE

### Communication appropriate for recipients

We place special importance on the adequate communication of complex technical issues. We also support our clients in communications with supervisory authorities and audit firms.

### Ex-ante transparency

Actuarial evaluations require a number of assumptions and method selections, which can have varying effects on the results in different situations. We make this context transparent and coordinate choices with the client.
